

ABSTRACT/ PAPER SUBMISSION AND PRESENTER GUIDELINES

All abstracts should be submitted by no later than 17 July, 2009 to be eligible to be considered for inclusion in the program. Presenters who wish for their papers to be peer-reviewed (see below) will be required to submit their full papers by 17 July, 2009.

Formats for Abstracts and important information regarding submission of abstracts are included in the Presenter Guidelines located on the web at <http://www.ignss.org/?D=42>. Please read these Guidelines carefully before submitting your abstract. Abstracts will not be accepted unless the Abstract Submission Form together with your Abstract (using the ABSTRACT Template) or your paper for peer review using the FULL PAPER Template are received. Both of these documents can be downloaded from the web at <http://www.ignss.org/?D=42>.

Abstracts are only accepted on the basis that presenters will attend the full symposium, register and pay the discounted member registration fee of \$AUD745 for the symposium. Refer to the Presenter Guidelines for all time lines of presentations and payment. Presenters who do not register and pay their registration fees by the due date, will not be eligible to be included in the program.

REFEREED & NON-REFEREED PAPERS

Presenters will be provided with the option of having their papers refereed and published in the refereed section of the proceedings. Presenters who require their papers to be refereed must submit their full papers with payment by 17 July, 2009.

Refereed papers will be reviewed before acceptance of contributions to the symposium in order to ensure the highest quality and to meet the requirements for the refereed publication standard. The referees will be asked to make an "accept/ reject" decision so the paper must be of a publishable standard when submitted or it will be rejected. Authors of rejected papers are still welcome to attend the conference and if they do, their papers will be published in the non-refereed section of the proceedings.

Non-refereed papers will be required by 1 October, 2009 for inclusion in the non-refereed section of the proceedings.

The proceedings will be published by Menay Pty Ltd, Australia and placed on the IGNSS Website. Access to the proceedings will be available for conference delegates only. Presenters who are "no shows" will not have their papers published in the Proceedings.

IGNSS SOCIETY INC – AWARDS FOR EXCELLENCE

The IGNSS Society will present three Award plaques at the commencement of the final session on the last day of the symposium.

Three awards will be presented for the following:-

- Best refereed student paper award**
- Best refereed non-student paper award**
- Best exhibition booth award**

FURTHER INFORMATION AND CONTACT DETAILS:

All requests for further information should be emailed to krys@ignss.org or contact:

The International Global Navigation Satellite Systems Society Inc. (IGNSS) Symposium on GPS/GNSS

ABN 50 493 173 615

IGNSS2009

1 – 3 December 2009

Holiday Inn, Gold Coast, Queensland, Australia

www.ignss.org

Call for Abstracts and Papers Registration of Interest

This IGNSS symposium includes open forums where users can discuss the implementation and application of GNSS and other location technologies, and voice their concerns in an interactive format with representatives from all the satellite system providers, major manufacturers and applications developers.

Closing date for Submission of Abstracts and/or Full Papers if they are to be reviewed – 17 July, 2009

INVITATION TO ATTEND

The International Global Navigation Satellite Systems (IGNSS) Society Inc. is pleased to announce the IGNSS 2009 symposium on GPS/GNSS that will be held from Tuesday 1 December to Thursday 3 December, 2009 at the Holiday Inn, Gold Coast, Queensland, Australia.

The program will include keynote speakers, oral presentations, interactive poster sessions, panel sessions, open interactive forums and an informative trade exhibition.

IGNSS SOCIETY ADVISORY COMMITTEE

Mr Matt Higgins (President), Principal Survey Advisor, Department of Natural Resources and Water, Brisbane Qld.

Professor Chris Rizos, School of Surveying & Spatial Information Systems, The University of New South Wales, Sydney NSW.

Associate Professor Andrew Dempster (Technical Chair), School of Surveying & Spatial Information Systems, The University of New South Wales, Sydney NSW.

Mr Rob Lorimer, Managing Partner, Position One Consulting, Brisbane Qld.

IGNSS Society Technical Symposium Chair

Associate Professor Andrew Dempster (Technical Symposium Chair), School of Surveying & Spatial Information Systems, The University of New South Wales, Sydney NSW.

ABOUT GNSS IN AUSTRALIA

Australia is seen internationally as having a history of stability, from a Government and from an economic point of view, thus making it very desirable as a potential southern hemisphere satellite navigation partner.

Australia, not having a satellite navigation system of its own, can truly be considered as a totally independent, neutral country, suitable for open and frank discussions regarding applications development on all satellite navigation systems.

Australia is in the enviable position of being "in sight" of all satellite navigation systems, existing and proposed.

Australia has developed a large sophisticated and innovative GNSS user community that has solved many unique problems related to sparsely populated, diverse geographic regions.

TARGET AUDIENCE

Whether you are looking for a technology update from a hardware or applications point of view, are involved in Government policy areas or are an end-user looking for a forum to discuss the implementation of GNSS, then IGNSS 2009 is the right place to be.

Join in at an interactive forum session, discuss your interests with representatives from all the satellite system providers, major hardware manufacturers and application developers.

THE VENUE

The Holiday Inn Surfers Paradise is perfectly located in the heart of Australia's most popular resort destination surrounded by restaurants, lively entertainment and shopping and is just 100 metres from magnificent Surfers Paradise beach. Holiday Inn Surfers Paradise is convenient to all Gold Coast attractions including numerous international golf courses, shopping malls and theme parks.

YOUR OPPORTUNITIES

- Discuss the current developments in navigation and location based services.
- Learn about the latest products, services and applications on the market.
- Interact with users, manufacturers and service providers.
- Mix with professionals from different backgrounds in a true cross-disciplinary event.
- Be informed of the latest international research on navigation technologies and applications.

TRADE EXHIBITION AND SPONSORSHIP

A trade exhibition, which will be open from Tuesday 1 December to Thursday 3 December 2009, is included in the Symposium registration. This is a great opportunity to see the latest products offered in Australia by leaders in the field of equipment, services and applications in positioning, navigation, location based services and more.

Many opportunities exist for companies or organisations to promote their services or products by purchasing one or more of the many sponsorship packages and/or trade exhibition packages available. The Symposium Sponsorship and Exhibition Prospectus can be viewed on the web page at www.ignss.org/?D=7 or contact the Society to receive a copy of the sponsorship prospectus. Sponsorship opportunities can be tailor made to suit your requirements.

SESSION STREAMS

The IGNSS Society is inviting presenters to submit abstracts and papers for consideration at IGNSS2009. Streams covering a wide range of GPS/ GNSS related topics including, but not limited to:

SYSTEM ISSUES

- Status of GNSS (GPS, Galileo, GLONASS, Compass, QZSS)
- Navigation Systems and Applications
- Positioning Trends & New Technologies
- Space Based & Ground Based Augmentation

RECEIVERS AND SIGNALS

- Receiver Design
- Signal Processing
- Signal Interference
- Multipath

POLICY ISSUES

- Organisational and Governance Issues
- Location Privacy

APPLICATIONS, PRODUCTS AND SERVICES

- International GNSS Applications & Developments
- Intelligent Transport Systems and Transport Telematics
- Location Based Services
- Surveying, Mapping & Geodesy
- Agriculture, Mining and Rural Industries
- Machine Automation
- Unmanned Aerial Vehicles
- Location Based Security
- Consumer Applications - Indoor, Urban & B2B
- GNSS and Environment Applications
- GPS in Emergency Management
- Precise Timing

NON-SATELLITE POSITIONING METHODS

- Sensor Networks
- Locata
- RFID Positioning
- Namuru
- Inertial Systems for Positioning & Orientation
- Interferometric Synthetic Aperture Radar (InSAR)
